Returning traits

Returning traits

The compiler needs to know the space required for a function return type

Returning traits

The compiler needs to know the space required for a function return type

A workaround is to return a box with a dyn trait

Returning traits

The compiler needs to know the space required for a function return type

A workaround is to return a box with a dyn trait

```
fn get_animal() -> Box<dyn Animal> {
   ...
}
```

Returning traits

The compiler needs to know the space required for a function return type

A workaround is to return a box with a dyn trait

```
fn get_animal() -> Box<dyn Animal> {
  ...
}
```

dyn is a new addition to the language

old code might not have it
